

GENERAL ROBOTICS LTD.

General Robotics Ltd. develops and manufactures advanced robotic systems for the Defense and Homeland Security markets. Our robotic systems are designed to meet current and future operational needs of Anti-Terror units, Special Ops, SWAT, infantry, law enforcement agencies and first responders.

Our systems enable our customers to save lives by sending robotic systems into Fatal Funnel instead of personnel. Each of our robotic systems is equipped with proprietary technology providing real-time situational awareness °360.

Point & Shoot™ technology enables fast reaction and pinpoint accuracy thereby improving decision making and reducing collateral damage.

We provide all of our systems with a unique Anti-Terror warranty that covers damages caused by terrorists engaging our systems.

General Robotics is a certified supplier to the Israeli Defense Ministry and to many other military forces and Special Ops units in various countries around the globe.

Ultra Light Hand-Held Anti-Terror Robot With Attacking Capabilities
